DETAILED ACTION

Status of Claims

1. Claims 1-20 are pending.
2. Claims 1-20 are rejected.

Specification

3. The disclosure is objected to because of the following informalities: the top of each page is of the specification and claims are missing sections due to a two-hole punch.

Appropriate correction is required.

1. A substitute specification along with the claims is required pursuant to 37 CFR 1.125(a) because the top of each page is of the specification and claims is missing sections due to a two-hole punch.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Art Unit: 1614

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Usala of U.S. Patent No. 5,824,331. Usala teaches of a composition containing L-arginine in a sustained-polymeric release matrix., (see abstract, columns 2-4, and claims 1-51).
